ThermoMark™ insulated doors are designed to deliver rugged durability combined with thermal efficiency.

These insulated doors, featuring CFC and HCFC-free polyurethane foam insulation, are available with two different R-values.

The ThermoMark™ 5255 is rated with an R-value* of 16.22, while the ThermoMark™ 5155 features an R-value of 12.12.

MATERIALS AND CONSTRUCTION

The ThermoMark™ 5155 and 5255 both feature hot-dipped galvanized steel construction that is pre-painted prior to manufacturing with a two-coat system of polyester paint with a finished coat (includes primer).

The inside and outside skins are roll-formed and separated with a thermal break to eliminate thermal conductance.

Hinge locations have 20-gauge continuous back up plates for fastening. The bottom astragal is a two-piece bulb-type astragal to be attached to the interior skin.

Section ends have end caps of 18-gauge hot-dipped galvanized steel, and a between-section joint seal is standard.

Contact Wayne Dalton for additional sizes and colors.

DOOR CONSTRUCTION

Stucco steel back panels
for good looks and easy cleaning.

Hot-dipped, galvanized steel
wrap-around end caps add strength, rigidity and long life.

CFC and HCFC free
polyurethane foam.

Sound absorbing insulation
makes door quieter in operation;
reduces wind rattling.

Two-coat, baked-on polyester
finish makes surface virtually
maintenance free.

Bulb-shaped bottom seal
remains flexible even in extreme
cold to help keep the bad weather
outside.
